

Dashboard Only: Complete insight and control over waste data

The Milgro Dashboard Only is specifically designed for organizations that manage their own waste processes or for international branches working with various waste management providers. It's also an ideal solution for our network partners who want to offer their clients valuable insights into waste data. This digital solution provides businesses with a comprehensive overview of their waste streams, including at international locations, helping them monitor performance in areas such as sustainability.

The benefits of Milgro Dashboard Only

- **Insight and transparency:** Gain a complete overview of waste streams, with easy comparison across locations within the organization.
- **Compliant reporting:** Ready-to-use reports that meet sustainability requirements like CSRD, saving time and ensuring full compliance without additional effort.
- **Circular strategy:** Assists companies and their partners in developing circular policies by providing insights into waste streams and their impact, enabling strategic decision-making.
- **For our network partners:** Partners can use this dashboard to provide their clients with valuable waste management insights, enhancing customer satisfaction and adding extra value.

Why waste insights are important

Pressure to meet stricter sustainability and reporting standards is increasing. Companies lacking a complete view of their waste streams risk inefficiencies, missed opportunities, and non-compliance. The Milgro Dashboard Only provides direct access to waste process insights, enabling organizations to effectively align their policies with circular goals.

Pricing (annual subscription)

One-time configuration fee: €165 per hour

Example configuration for 3 locations, 8 waste streams: 16 hours configuration

Monthly subscription fee:

	# users	# locations	# streams	monthly cost
Starter	2	3	8	€85,- / mo
Professional	5	10	12	€395,- / mo
Enterprise	15	50	24	€845,- / mo
Unlimited	Unlimited	Unlimited	Unlimited	€5000,- / mo

Application process

1. Schedule an appointment: Discuss necessary configuration together.
2. Data exchange: Gather and analyze needed data for complete insight.
3. Prototype dashboard: A custom-built prototype based on your data, demonstrated to you.
4. Realtime dashboard: The prototype is transformed into a fully operational dashboard, updating in real time with your data.

7-day trial

Take a test drive with a 7-day trial account. Discover how the dashboard not only aids compliance but also empowers you to develop circular strategies and optimize waste management performance..

Milgro aims for a waste-free world by 2040. Together with our clients and partners, we work to transform resources into reusable materials. How? By connecting those disposing of used resources with those who will reuse them. Together, we are building a world where resources are continuously reused. Onward to a truly circular economy. Will you join us?
